

Yosif Munther

**Goal:** The goal of this app is to allow people to have the full experience of ordering and enjoying a meal at a restaurant without having to necessarily interact with anyone due to their respective backgrounds such as deafness, muteness, social anxiety, germaphobia, etc.

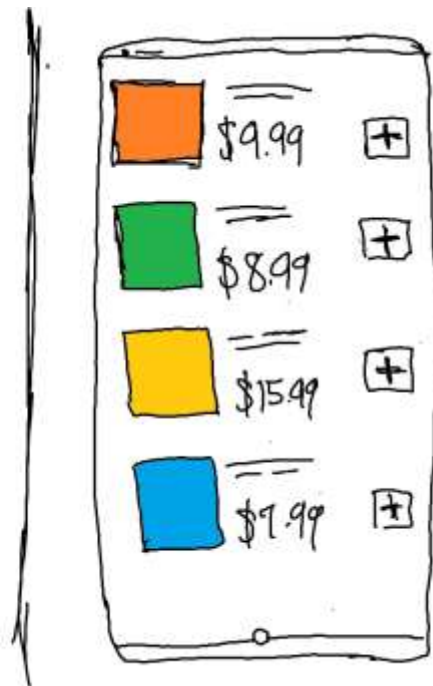

**Feature List:**

- Viewing Menu
- Online Ordering
- Dine-In Ordering
- Chat with Wait Staff
- Payment Processing + Tips

**Solution Sketches:**

Viewing Menu

let's customers  
view the menu of  
the restaurant and  
add items to their  
order.

- The interface shows a picture of each item on the menu, the name of the item, and the price.
- Next to each item, there is a plus button that let customers add an item to their order.
