

Design Sprint Day 2

The Goal of The App

We want to create an application that makes the restaurant experience easier for everyone. The app will allow people with disabilities such as anxiety, deafness, or being mute to still interact with restaurant staff easily. This app isn't just for the disabled though, anyone can use the app to order food, communicate with the waitstaff, and explain special requirements they might need.

Feature List:

- Reservations
- Online Ordering
- Dine-in Ordering
- Viewing Menu
- Chat with wait staff
- Payment processing + tips

Sketch

A menu that groups different types of food into categories

Coppola's Pizzeria		
Pasta	Pizza	Salad
 Cheese pizza \$8.99	 Pepperoni pizza \$9.99	 Hawaiian pizza \$11.99
 \$5.99	 \$8.99	 \$13.99
		

When each item is selected, user is brought to a popup that allows for customization such as extra sauce, etc.. Item is then added to order and total bill is updated
